PROFESSIONAL SUMMARY

High-performance Full Stack Engineer with 2+ years of experience. Expert at architecting scalable web applications using the **MERN Stack** and **Next.js 16**. Specialized in modern authentication systems, **ORM management**, and optimizing Core Web Vitals for high-end user experiences.

TECHNICAL ARSENAL

- **Frontend: Next.js 16 (App Router), React 19, TypeScript, Tailwind CSS v4, Framer Motion, Shadcn UI, Redux Toolkit.Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, Zod Validation, Middleware.
- **Database: PostgreSQL (Neon)**, MongoDB, Mongoose.
- **Tools/Libraries: Git, Docker, Vercel, dnd-kit, Axios, Postman.**

KEY PROJECTS

Modern Blog System | Next.js 16, Prisma, PostgreSQL, Better Auth

- **Engineered a high-performance blogging platform with Server-Side Rendering (SSR) and Edge Data fetching.**
- **Implemented a robust authentication system using Better Auth, supporting both Email/Password and Social Login (GitHub/Google).**
- **Architected a scalable relational database schema using Prisma ORM and Neon PostgreSQL.**
- **Integrated Shadcn UI and Tailwind CSS v4 for a cutting-edge, responsive dark/light mode interface.**

Job Application Tracker | *Next.js, MongoDB, Express, dnd-kit, Tailwind*

- Engineered a high-performance dashboard for managing job search pipelines using an interactive **Drag-and-Drop** interface.

- Integrated secure JWT-based authentication and real-time state persistence.
- Optimized data fetching using Next.js Server Components, resulting in a 30% faster initial load time.

Rose Misk Store (E-Commerce) | *React, Tailwind CSS*

- Developed a premium frontend for an online fragrance boutique with a focus on high-end visual aesthetics.
- Implemented complex interactive animations using **Framer Motion** to enhance user engagement.
- Achieved a **98/100 Lighthouse performance score** through image optimization and lazy loading.

MERN E-Commerce Platform | *MongoDB, Express, React, Node.js*

- Built a full-scale commerce engine with dynamic product filtering, shopping cart logic, and user account management.
- Developed a custom REST API to handle high-frequency database queries with optimized Mongoose schemas.

EXPERIENCE

Full Stack Developer (Freelance / Personal Projects) | *2024 – Present*

- Delivered 10+ projects focusing on clean code, responsive design, and scalable architecture.
- Successfully integrated third-party APIs and payment gateways (Stripe/PayPal) into existing workflows.
- Collaborated with clients to translate business requirements into technical roadmaps.

EDUCATION & SPECIALIZED TRAINING

Full Stack Engineering (Self-Directed) | *YouTube & Open Source Documentation* * Mastered advanced Frontend architectures, focusing on React 19, Next.js App Router, and Tailwind CSS v4.

- **Synthesized curriculum from industry-leading engineers (e.g., *JavaScript Mastery, Traversy Media, Fireship*) to build production-ready UI/UX components.**

The Complete Backend Development Bootcamp [View Certificate]

Core Focus: Node.js, Express.js, MongoDB, RESTful API Design, JWT Authentication, and Backend Security.

- **Engineered scalable server-side logic and database schemas, implementing best practices for error handling and middleware.**
- **Modern Auth: Expert in implementing secure authentication using Better Auth (OAuth 2.0) and JWT, including social logins and session management.**
- **Database Modeling: Proficient in PostgreSQL with Prisma ORM for relational data, alongside MongoDB/Mongoose for NoSQL solutions.**
- **Reliability: Implemented advanced Middleware for error handling and strict schema validation using Zod.**

LANGUAGES

- **Arabic:** Native
- **English:** Professional Working Proficiency
